Contents of Volume 76

Volume 76, Number 1, May 9, 1977

AUTHOR INDEX, Volume 76, Number 1, May 9, 1977	ii
BENG T OSTERLUND and WILLIAM A. BRIDGER. Effect of a Peptide Stabilizing Factor on Liver ATP Citrate Lyase	1
YASUTO TONEGAWA and SEN-ITIROH HAKOMORI. "Ganglioprotein and Globoprotein": The Glycoproteins Reacting with Anti-Ganglioside and Anti-Globoside Antibodies and the Ganglioprotein Change Associated with Transformation	9
KAZUEI IGARASHI, YASUHIRO WATANABE, ETSUKO MATSUMOTO, ATSUKO KOGO, MASUMI YABUKI, and SEIYU HIROSE. Responsibility of 16S RNA for the Stimulation of Polypeptide Synthesis by Spermidine	18
TOMOFUSA TSUCHIYA, JANE RAVEN, and T. HASTINGS WILSON. Co-Transport of Na ⁺ and Methyl- β -D-Thiogalactopyranoside Mediated by the Melibiose Transport System of <i>Escherichia coli</i>	26
R. J. YOUNG. Appearance of 7-Methylguanosine-5'-Phosphate in the RNA of Mouse 1-Cell Embryos Three Hours after Fertilization	32
MICHAEL D. KLUETZ and PAUL G. SCHMIDT. Diamine Oxidase: Molecular Weight and Subunit Analysis	40
STEPHEN J. JACOBSEN, JAMES A. NORTH, N. APPAJI RAO, and JOHN H. MANGUM. 5-Methyl-tetrahydrofolate: Synthesis and Utilization in Normal and SV40-Transformed BHK-21 Cells	46
Y. YOSHINAKA and R. B. LUFTIG. Partial Characterization of a P70 Proteolytic Factor That Is Present in Purified Virions of Rauscher Leukemia Virus (RLV)	54
HOWARD L. LEVINE, Y. NAKAGAWA, and E. T. KAISER. Flavopapain: Synthesis and Properties of Semi-Synthetic Enzymes	64
ADHIP P. NANDI MAJUMDAR and ATIF M. NAKHLA. Influence of Tryptophan on the Activity of Acetylcholinesterase in the Brain of Well-Fed Normal and Adrenalectomized Rats	71
JANOS SUMEGI, DANIELLE BREEDVELD, PAUL HOSSENLOPP, and PIERRE CHAMBON. A Rapid Procedure for Purification of EcoRI Endonuclease	78
DHIRAYOS WITTITSUWANNAKUL and KI-HAN KIM. Effect of Cycloheximide on Adenosine 3':5'-Monophosphate Level in Rat Epididymal Fat Tissue	86
BJORN AKESSON. Manipulation of Phospholipid Polar Headgroup Composition in Primary Cultures of Rat Hepatocytes	93
MAKOTO YAGUCHI, CAMILLE ROY, MICHAEL DOVE, and VERNER SELIGY. Amino Acid Sequence Homologies Between H1 and H5 Histones	100
M. F. HOLICK, J. E. FROMMER, S. C. McNEILL, N. M. RICHTAND, J. W. HENLEY, and J. T. POTTS, JR. Photometabolism of 7-Dehydrocholesterol to Previtamin D ₃ in Skin	107
AMALIA SLOMIANY and BRONISLAW L. SLOMIANY. Neutral Glycero-glucolipids of the Human Gastric Content	115
PETER C. BROWN and JOHN PAPACONSTANTINOU. Identification of Albumin-Synthesizing Polysomes from Mouse Liver and a Mouse Hepatoma Cell Line	121
NIRANKAR S. AGARWAL, VICTOR J. HRUBY, ROBERT KATZ, WERNER KLEE, and MARSHALL NIRENBERG. Synthesis of Leucine Enkephalin Derivatives: Structure-Function Studies	129
MICHIKO MIYAKI, GEN-EI SAI, SANAE KATAGIRI, NORIKO AKAMATSU, and TETSUO ONO. Enhancement of DNA Polymerase II Activity in <i>E. coli</i> after Treatment with N-Methyl-N'-Nitro-N-Nitrosoguanidine	136
I. VIRTANEN, J. BROTHERRUS, O. RENKONEN, and J. WARTIOVAARA. Phospholipids of Outer and Inner Nuclear Membranes in Rat Liver and BHK-21 Cells	142
MARK D. MAMRACK, MARK O. J. OLSON, and HARRIS BUSCH. Negatively Charged Phosphopeptides of Nucleolar Nonhistone Proteins from Novikoff Hepatoma Ascites Cells	150
SHIGEKI SAKAKIBARA, FRANK D. WICKS, and ROBERT K. GHOLSON. Occurrence in Mammalian Liver of a Protein Which Replaces the B Protein of <i>E. coli</i> Quinolinate Synthetase	158
ALAN M. FOGELMAN, JANET SEAGER, PETER A. EDWARDS, MARTHA HOKOM, and G. POPJAK. Cholesterol Biosynthesis in Human Lymphocytes, Monocytes, and Granulocytes	167
TOSHITSUGU YUBISUI, TAKASUMI MATSUKI, KIYOO TANISHIMA, MASAZUMI TAKESHITA, and YOSHIMASA YONEYAMA. NADPH-Flavin Reductase in Human Erythrocytes and the Reduction of Methemoglobin through Flavin by the Enzyme	174

IENNIE COCCO, RAYMOND L. BLAKLEY, THOMAS E. WALKER, ROBERT E. LONDON, and N. A. MATWIYOFF. A ^{13}C Nuclear Magnetic Resonance Study of the Interaction of Ligands with Arginine Residues in Dihydrofolate Reductase	183
MICHAEL J. BRABEC, TIMOTHY PASTOOR, PETER DRENCHKO, JR., REBECCA HEAD, and I. A. BERNSTEIN. Loss of Sulfite Oxidase Activity and Outer Membrane Damage in Rat Hepatic Mitochondria during CCl_4 Poisoning	189
MARTHA K. LOESTER, ADELE M. REGISTER, and ERNST A. NOLTMANN. Basic Muscle Protein, a Third Genetic Locus Isoenzyme of Carbonic Anhydrase?	196

Volume 76, Number 2, May 23, 1977

AUTHOR INDEX, Volume 76, Number 2, May 23, 1977	ii
DORIS TAYLOR, RICHARD BAKER, and PAUL HOCHSTEIN. The Effect of Calcium Ionophore A23187 on the ATP Level of Human Erythrocytes	205
GISELE BERTHILLIER and RENE GOT. Subcellular Distribution of a Rat Hepatic Binding Protein Specific for Uridine Diphosphoglucose	212
C. STOCK, J. F. LAUNAY, J. F. GRENIER, and H. BAUDUIN. Vinblastine Potentiates the Secretagogue Action of Dibutyryl Cyclic AMP on the Exocrine Pancreas	217
M. A. KHALED, M. M. LONG, W. D. THOMPSON, R. J. BRADLEY, G. B. BROWN, and D. W. URRY. Conformational States of Enkephalins in Solution	224
WILLIAM STILLWELL and H. TI TIEN. Protection of Chlorophyll by Phospholipids from Photooxidation	232
W. G. BESSLER and B. P. OTTENBREIT. Studies on the Mitogenic Principle of the Lipoprotein from the Outer Membrane of <i>Escherichia coli</i>	239

AUTHOR INDEX, Volume 76	1300

Information for Contributors

BIOCHEMICAL AND BIOPHYSICAL RESEARCH COMMUNICATIONS is devoted to the rapid dissemination of timely and significant observations in the diverse fields of modern experimental biology. Manuscripts submitted should be so written as to emphasize clearly the novel aspects of the information reported.

Original papers only will be considered. Manuscripts are accepted for review with the understanding that the same work has not been and will not be published nor is presently submitted elsewhere, and that all persons listed as authors have given their approval for the submission of the paper; further, that any person cited as a source of personal communications has approved such citation. Written authorization may be required at the Editor's discretion. Articles and any other material published in BIOCHEMICAL AND BIOPHYSICAL RESEARCH COMMUNICATIONS represent the opinions of the author(s) and should not be construed to reflect the opinions of the Editor(s) and the Publisher.

Manuscripts in duplicate may be sent to any one of the editors whose names and addresses are listed on the inside front cover.

To ensure rapid and accurate publication, it is essential that manuscripts conform to the instructions which follow. Manuscripts which are not in accordance with these specifications may be returned.

Preparation of Manuscripts

Article length should not exceed 5 typewritten pages, double-spaced on 8.5 X 11 in. high quality paper (the complete manuscript, including space occupied by figures and tables, should not exceed 8 pages).

Summary. Each article must be preceded by a brief summary, typed single-spaced, not exceeding 10 lines (approximately 100–150 words). This paragraph should adequately summarize the pertinent findings of the paper.

Typing. Articles are reproduced directly from the submitted manuscript as camera-ready copy. Manuscripts must therefore be typewritten on good quality white bond paper. A black silk or carbon typewriter ribbon should be used. Special care should be taken to ensure a sharp clean impression of letters throughout. Use of an electric typewriter is strongly recommended. Erasures should be avoided. Care must also be taken to avoid errors in spelling, word division and punctuation. **No changes may be made in manuscripts after acceptance.**

Manuscripts should be double-spaced on one side of the sheet; **methods, references, footnotes and figure legends should be single-spaced.** Typing area of the page must be as close as possible to 6.5 in. wide and 9.5 in. long.

Symbols and Abbreviations defined in the IUPAC-IUB Document No. 1 (*Arch. Biochem. Biophys.* (1966) 115, 1–12) may be used without definition. Use of all other abbreviations and symbols is to be avoided. When abbreviations are essential, they should be consistent with the form and style of the above document and **must be defined in a single footnote and typed on a separate page**, rather than in the text. Such abbreviations **must not** be used in the Summary.

Enzyme names should not be abbreviated except when the substrate has an approved abbreviation (e.g., ATPase). Use the Enzyme Commission ("EC") code number when available.

Isotopes should be styled following the recommendations of the IUB Commission of Editors of Biochemical Journals. The symbol of the isotope introduced should be placed in square brackets directly attached to the front of the name (e.g., [^{32}P]CMP). Note that the isotope number should only be used as a (superior) prefix to the atomic symbol, not to an abbreviation.

In the Methods section, authors should draw attention to any particular chemical or biological hazards that may be involved in carrying out the experiments described. Any relevant safety precautions should be described; if an accepted code of practice has been followed, a reference to the relevant standards should be given.

For further information regarding nomenclature authors are advised to consult the Instructions to Authors of the **Archives of Biochemistry and Biophysics** (1974) 160, iii-xii. Reprints are available from the Publisher.

Footnotes, references, and figure legends should be typed single-spaced on separate pages.

Illustrations and Tables. **Do not attempt to insert figures, figure legends or tables into the text.** This will be done by the Publisher.

All drawings should be clearly labeled in black ink in a manner suitable for direct reproduction (Leroy lettering size 120 or 140). Do not use press-on lettering; typewritten lettering is not acceptable.

Figures will be reduced to fit within the type area of the page (approximately 5 X 8 in.); the original drawings should be no larger than 8.5 X 11 in.

Glossy photographs of drawings are acceptable provided they are sharp, clear prints with an even *black* density.

Mathematical or chemical symbols that cannot be typed should be inked in carefully in black. Structural formulas should be drawn in black ink.

Illustrations and tables should be submitted on separate sheets.

Page Numbers and Headings. Page numbers should be typed at the top of the page.

The title of the paper should be typed in capital letters near the top of the first page, with the name(s) and affiliation(s) of the author(s) typed just below. Headings within the article should be arranged according to their relative importance.

References to the literature should be cited by the number in parentheses in the text and listed in numerical order in a single-spaced typed list placed at the end of the manuscript. Abbreviations of journals should conform to those of *Chemical Abstracts Service Source Index, 1969*. Note the following examples.

For a journal article:

1. Chattoraj, D. K., and Bull, H. B. (1971) Arch. Biochem. Biophys. 142, 363-370.

For a book by one or more authors:

2. Robinson, G. A., Sutherland, E. W., and Butcher, E. (1971) Cyclic AMP, pp. 298-302, Academic Press, New York.

Note that inclusive pagination must be given.

Acknowledgment of Receipt. Authors desiring acknowledgment of receipt of manuscript should enclose a stamped self-addressed card.

Reprints. Reprint order forms, with price lists, are sent to the authors
